

Center for Cybercrime Studies

Hosts

Capstone I, CSCI 400 Presentation of Research Projects Computer Science & Information Security Major

Instructor Sven Dietrich

Date: Dec. 12, 2016

Time: 1:40 – 2:40 pm

Math & CS Conference Room (6.63.37), 6th Floor, New Building

On Monday we will once again have the end of the semester poster session. Students will get together to show their semester research projects from the CSCI 400 Cybersecurity Capstone course and other courses. If you wish to bring your students or have them present work, please feel free to do so. Presentations can be in the form of printed posters, sheets pasted on poster boards or trifold poster boards, or simply PowerPoint slides arranged in a poster size presentation.

Do drop by, take a look, comment on projects or just mingle. The topics include applied cryptography, fuzzing, security protocols, multi-level security, network traffic analysis, and more.

We will also discuss the security challenges the students have been working on in the 06.65 hallway and declare the winners.

All students are welcome. Freshmen, sophomores, and juniors should come to get an idea of the type of work they will do in the senior year.

This is a Center for Cybercrime Studies co-sponsored event and light refreshments and snacks will be available.

See you Monday, Dec. 12 during Community Hour!
